Thanks, Donn. So is work happening today (TH) and tomorrow? Do you send out any kind of electronic notice to the community? Or, did you want me to send something out to my mailing list? Did not know if it warrants some kind of upfront notice of if I just need to answer the questions should anyone call me? I am thinking the latter. Please let me know.

Scott

Subject: San Jacinto River Waste Pits TCRA Cap Inspection activities.

As part of the site's ongoing TCRA Cap monitoring, the site's contractors will be onsite this week to conduct routine cap maintenance related activities. Local community members... may notice workers and equipment through this week and be concerned. However the site's cap RP contractors under the direction of Valmichael Leos, EPA, and David Keith, Anchor QEA, LLC will be onsite starting today to conduct vegetation control around the signs and on top the site.

Thanks.
